The perfect combination of additional features combined with promotional tools allows operators to **reach new potential, save time, and run their businesses more efficiently.**

FunctionalTools

A range of technical solutions designed to automate casino operations and streamline processes. These tools provide valuable data for backend or frontend use, helping operators enhance efficiency and reduce manual workloads.

Recommendation Engine NEW

AI-driven tool that enables operators to deliver highly personalized gaming experiences by showcasing the games players are most likely to enjoy, based on their individual preferences and behaviour.

Client Area

An exclusive portal where you can effortlessly access all relevant information about upcoming game releases, promotions, and more.

Real-time Feeds

Providing operators with valuable real-time data feeds that can be seamlessly incorporated into their design, including Unified Jackpot, Biggest and Latest Winners, and Live RTP.

Game History

Valuable tool that gives operators access to detailed game history with graphically represented results, allowing seamless integration into their back-office.

Automated Game Library

Comprehensive tool, providing operators with detailed game descriptions, categories, RTP values, volatility levels, and a wide range of graphic assets, including animated icons.

PromoTools

A versatile set of features allowing operators to create dynamic campaigns, from simple Freerounds to advanced options like Leaderboards and Fuel Jackpots. These tools drive player engagement, boost retention, and attract new audiences, helping operators grow their business.

Drops

A simple yet powerful way to create special events where awards are randomly triggered during gameplay.

Fuel Jackpot

A versatile and user-friendly tool allowing operators to create dedicated jackpots, across all games and providers, exclusive to their casinos, where only their players can participate and win.

Leaderboard

Powerful tool available across entire gaming library, enabling operators to create personalized, game-based promotions where players compete for cash or physical prizes based on various ranking options.

Feature Triggering

A flexible tool that enables operators to grant players direct entry into the in-game bonus feature of a selected game, making it especially suitable for VIP audience promotions.

FreeRounds

Classic promo tool that enables simple distribution of free spins across a wide range of game providers, allowing operators to target selected players based on their own logic.

Ocean full of Casino Games

Game Library

We offer an extensive selection of games, from **slots and live dealer tables** to **sportsbooks**, **virtual games**, and trending **crash games**.
